DROP electric heater is inspired by the purest element of nature - a drop of water. DROP's round design softens and enlivens the interior of the sauna, adding elegance to the steam room. Apart from good looks, DROP has other outstanding features. The compact wall-mounted heater holds up to 55 kg of stones, outperforming even some wood burning sauna stoves and ensuring **long-lasting steam**.

DROP is compatible with the WiFi-capable control system UKU, so that you can conveniently heat the sauna in the phone application, while you are still on the hiking trail or at the end of a long day at work.

THE SET INCLUDES:

- ◆ electric sauna heater
- ◆ wall mounted plate
- ◆ 9 kW DROP heater includes a heat guiding device

REQUIRES ALSO:

- ◆ UKU sauna control system
- ◆ stones (5-10 cm)
- ◆ heat-resistant power cable

ACCESSORIES:

- ◆ safety railing
- ◆ embedding flange

SAFETY RAILING

Safety railing for DROP heaters helps protect you from accidentally touching against the hot heater. The safety railing consists of light-colored wooden arcs, and stainless steel supports to attach them to the heater. The railing provides extra safety, but it is also an excellent way to style your heater.

SIMPLE AND QUICK INSTALLATION

Connect wooden arches to the support with four screws to form a complete railing.

EMBEDDING FLANGE

The embedding flange is useful when you plan to install your heater partly inside the sauna bench. It is made of stainless steel, and it covers up the wooden edges around the heater, leaving the final result looking refined and smooth.
